Wellcome Trust	Early Career Awards	Salary and up to £400,000 for research expenses for 5 years.	Early stage of their research career but there is no limit on time since PhD.	February and June annually

The table above describes funding opportunities for Early Career Researchers and is split into Science and A&H&SS for convenience. There is some duplication across these categories.

Standard grant schemes are shaded blue and have specific caveats surrounding non-permanent HEI employees applying for grants. All other schemes are Fellowship schemes.

Note that 100% of time for a PI would be on average £114k p.a. including Estates and Indirect costs (Classroom rate), so AHRC and ESRC awards can only support PI salaries for a reduced grant duration.

*The ESRC New Investigator scheme's ethos is to provide leadership training for the PI, especially in leading a team. This is in conflict with claiming 100% for salary costs for the project duration.

Schemes have been split and described broadly under Sciences and A&H&SS with the scope of the scheme related to the remit of the funder
